

Objectives

- (i) Provide a platform for access to and display of comprehensive coastal erosion and vulnerability data for Dominica (with possible linkages to the existing Government of Dominica's database DOMINODE)
- (ii) Incorporate localised Resilience Guidelines
- (iii) Pilot a coastal citizen stewardship programme for community ownership of coastal management across Dominica.

Target Groups

- Tourism stakeholders (Government & private)
- Public Works and Digital Economy ICT department, Physical Planning Division
- Government ministers and policy makers
- Local coastal communities and residents

Beneficiaries

Dominica coastal community stakeholders, communities and coastal related industries

Methodology

Expected Results

- Improving coastal data in Dominica
- Improving Dominica's DOMINODE data platform and maximizing the Government ministries and potential across stakeholders
- Strengthened sustainability of coastal zone monitoring
